

Seeagle

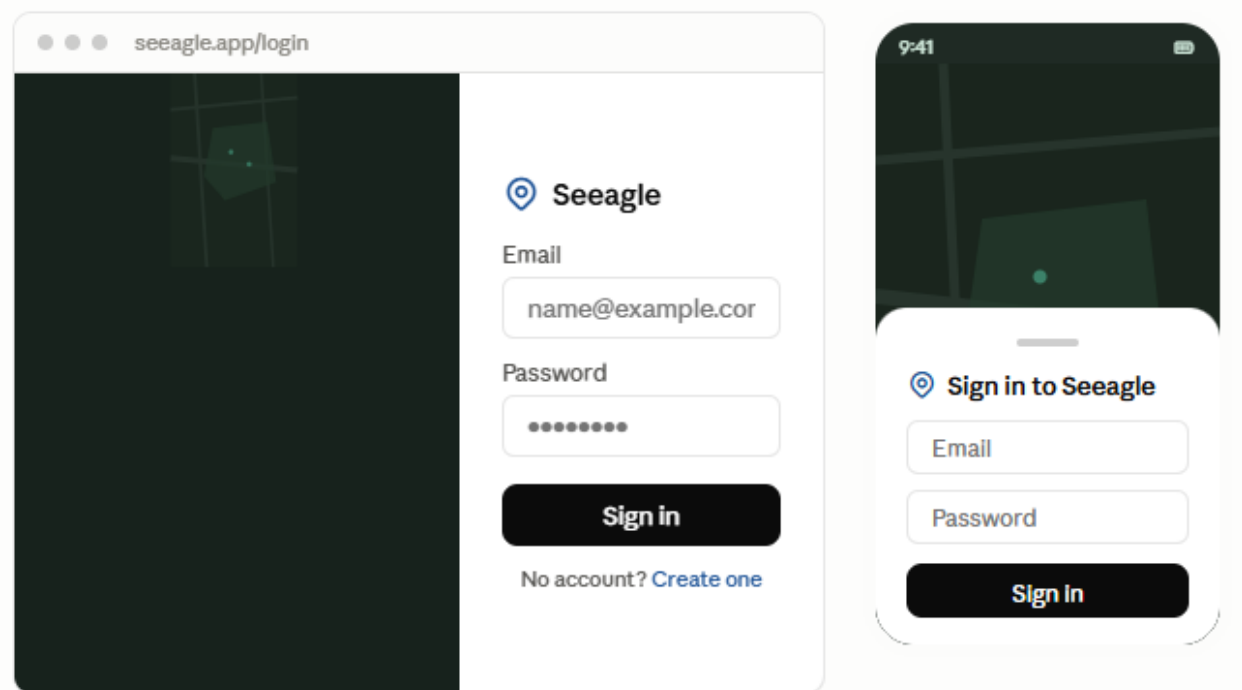

Seeagle (team **Helios**) is a map-based civic reporting platform. Users report issues or observations by dropping a pin or drawing a line on a map, scoped to admin-defined areas. Every report has a type. Admins can add/edit/remove types. Reports stay pending until a moderator — who only sees types they're assigned to — approves or rejects them, optionally responding to the reporter. Only approved reports appear publicly.

Roles:

- User (reports)
- Guest / Not logged in (can only see the reports)
- Moderator (reviews, scoped by type)
- Admin (defines areas, types, moderator permissions)

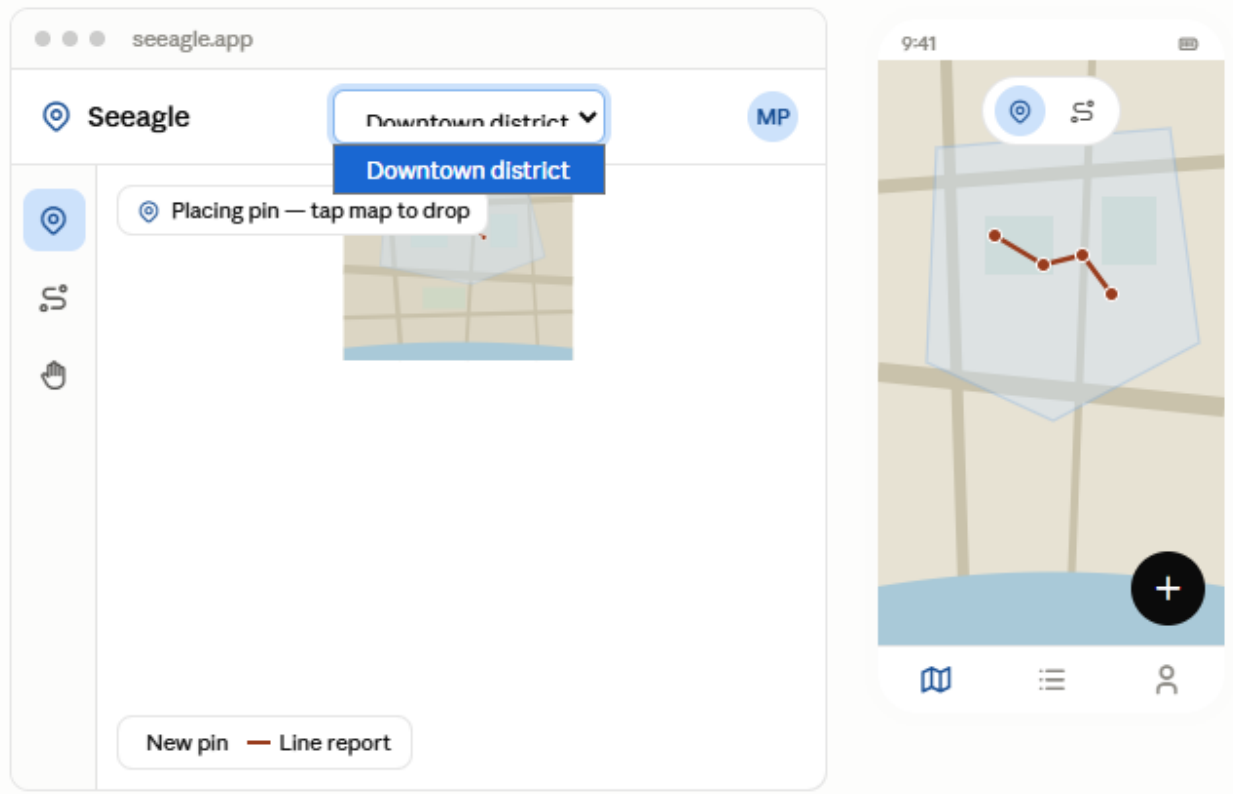

Mockups

Login / Register screen

Register will be similar, can include more fields (e.g. Name).

Homepage (logged in)

*display full screen map for the desktop page as well

The unauthenticated / guest Homepage should be similar, without the user information (request login on **Account** button press).

Submit a report – Modal

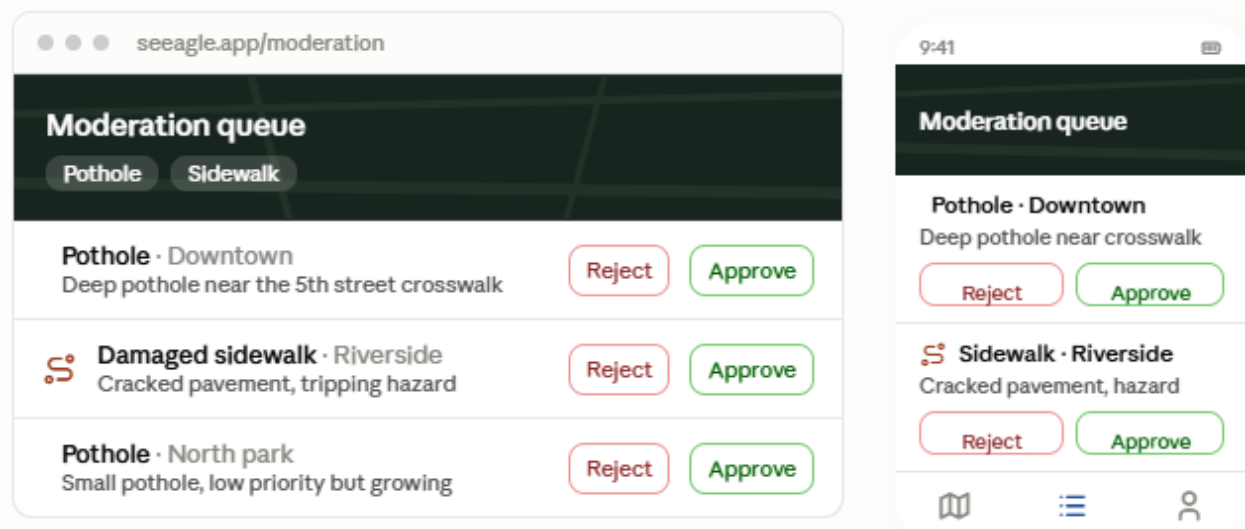

The image shows a 'New report' modal window. It has a title bar with a close button (X). The form contains the following elements:

- Geometry:** Two buttons, 'Pin' (active, blue) and 'Line' (disabled, grayed-out).
- Report type:** A dropdown menu with 'Pothole' selected.
- Description:** A text input field with the placeholder text 'Describe what you saw'.
- Location:** A text label showing 'Location captured from map: 44.4268° N, 26.1025° E'.
- Buttons:** 'Cancel' and 'Submit report' at the bottom.

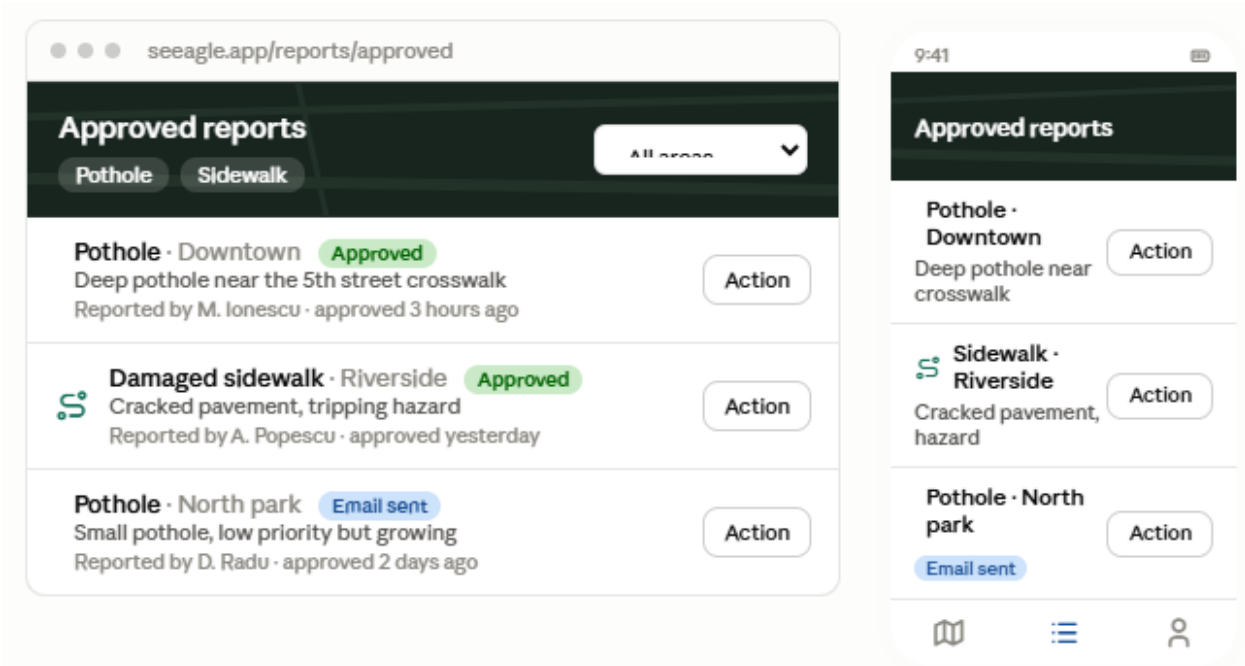

For the first iteration I want only the **Pin**. Display **Line** as a grayed-out option with a “coming soon” small text.

Action modal

Admin view

For the MVP I want the area to be square.
